

Dynamicroll Easy

Dynamicroll Easy High-speed doors are self-repairing, meaning that if the door curtain comes out of their guides (for example, in the event of impact with a forklift) the system will automatically reset the curtain back into the guide on the next close cycle.

Dynamicroll Easy columns are made from galvanized steel, or can be custom-ordered in stainless steel and painted various RAL colours. Modular construction allows easy interchange of door parts.

At the heart of the Dynamicroll Easy door design is our innovative curtain edge that firmly holds the curtain into the side guides. If impacted, the curtain will release from the side guide and automatically reset on the next door cycle. Because there are no metal parts within the curtain design, damage is kept to a minimum.

Features & Benefits

- Up to 1 m/s opening speed
- 1 ph inverter drive control panels
- Barrel diameter sensor in the heading
- Self repairing curtain following impact
- Canopy cover included
- 1300 g/m² curtain with 12 standard colours
- 2 rows of vision as standard
- Frame and all covers are galvanised as standard
- Stainless steel and painted frames and covers (optional)
- Simple modular design
- Manual release handle as standard
- Quick lead times
- Proven reliable design
- Helps to reduce heat loss and vermin
