

F 32 TLK

TELESCOPIC AERIAL LADDER PLATFORM

Bronto Skylift - Above All

Above **All**

F 32 TLK

	Max. working height	Safe working load	Max. working outreach	Max. up-and-over capacity	Water capacity	Transportation height, approx.	Transportation length, approx.	Typical GVW
F 32 TLK	32 m	500 kg	25 m	7 m	2500 l/min	3,3 m	9 m	17 t

New turntable control center with ergonomically designed seat and integrated control levers at armrests.

Outrigger controls on both sides as per DIN.

All F 32 TLK units have Bronto+ electronic control system. Control centers have full colour displays with excellent visibility.

The big rescue platform, the noncorrosive waterway, the stable telescopic ladder – Bronto Skylift F 32 TLK has all the features required for effective rescue and fire fighting. Mounted onto two-axle chassis F 32 TLK is extremely compact, giving access to congested streets and narrow alleys. With the total length less than 9 m - no rear overhang - and the height of appr. 3 m plus the wide variety of optional equipment, F 32 TLK is a perfect choice for any fire brigade.

Bronto+ electronic control system makes the operating of the unit easy and safe, and allows positioning of the unit in limited space. The outriggers can be positioned individually and steplessly, and the platform load selected. Based on outrigger positioning and selected platform load the system controls the outreach to all directions.

Bronto Skylift F 32 TLK's meet the requirements stated in EN 14043 and comply with EN 1777 for hydraulic platforms for fire fighting and rescue services.
