

THE FORKLIFT

CGH 23
Pallet Truck

Hand pallet truck CLARK CGH23 2300 KG

Product Description

The Clark hand pallet truck CGH is distinguished by the same consistently reliable features which are typical for Clark products everywhere.

The robust design of the CGH is built to last. With a capacity of 2300 kg it's just the hand pallet truck you need for your business.

Frame and forks

- The frame and forks of the CGH are of a welded steel structure, with heavy reinforcing at high load point areas.
- Rounded tapered fork ends minimise damage at pallet entry.
- Pallet entry and exit rollers allow easy pallet entry/exit with minimum damage.
- AU bearing points easily accessible for ease of maintenance and lubrication.

Hydraulics

- Heavy duty robust design with hard chrome-plated pistons with overload safety device.
- Load lowering valve ensures even lowering.
- Three position hydraulic control for lifting - neutral - lowering.
- "Single point service" Easy replaceable hydraulic unit with easy access.

General

- Totally enclosed bearings prevents dirt ingress and ensures long service life
- Steel drawbar with protected handle for strength and safety
- Pivot mounted steer wheels ensures high stability on uneven surfaces
- 210 degree steer handle arc enables easy manoeuvring in confined areas
- Large 200 mm rubber steer wheels for long life and improved stability
- Black nylon tandem wheels as standard

Drawbar and control handle

- Manufactured from steel for extra strength, with a closed loop design control handle, the drawbar gives perfect control and protection for the operator's hands in restricted areas. The covered handle gives a "warm feel" ensuring positive control in all environments.
- Three position hydraulic control -Lifting - Neutral - Lowering mounted inside the control handle on the right hand side allows pumping at the most convenient angle for the operator and free handle when the truck is moving.

Options

- Truck width: 520 mm
- Fork lengths: 1150 mm
- Steering wheels: 200 x 50 mm nylon
