

# Winlet 400

A series of glazing robots with a full range of features - allowing you to build the Winlet 400 that fits your needs exactly.

- Fully hydraulic for optimal durability and speed.
- 100% linear movements of the load at the front for optimal precision.
- Choice of wheel configuration for optimal accommodation of the work environment.
- Load adjustment at the cup for optimal control.
- Intelligent overload monitoring system for optimal safety.
- Optimal flexibility in the choice of proportional or multi axis control.

# **TECHNICAL SPECIFICATIONS - OVERVIEW**

# How to build your Winlet 400

The Winlet 400 series from GMV is of a range of state-of-the-art glazing robots lifting up to 500 kg. designed to meet all needs during window- and glass installations. In this series of vacuum lifts the vital parts of the machine are custom made to make sure you get exactly the Winlet 400 you need for your projects.

When building your Winlet 400 you go through 4 steps each of which is a configuration group where you have two different options. Which of those options you choose will depend on the type of installation you are doing and in what kind of environment.

These are the 4 configurations you go through when building your Winlet 400.

Choose between different types of:

Take a look at the product key on the next page for more detailed information of the different options within the configurations.

Remember, we are always ready to help and guide you through the selection process so don't hesitate to contact us.

# Winlet 400 CL SHB HV PSAC

# CL - COMPACT LIFTER

This model is equipped with small steering wheels and slim traction wheels which gives it low friction and makes it easy to turn.

This is the most compact machine available and is ideal for working in narrow spaces.

# TL - TERRAIN LIFTER

This machine has large and wide steering wheels as well as traction wheels.

This gives it great stability and strong traction.

The ideal choice for outdoor installations.

# SHB - SINGLE HYDRAULIC BOOM

Hydraulic boom with single stroke telescopic profiles. Higher lifting capacity and the most compact machine available with 1x500 mm. extension.

Ideal for installations that does not require long reach.

# DHB - DOUBLE HYDRAULIC BOOM

Hydraulic boom with double stroke telescopic profiles. More reach and more lifting height with full hydraulic movements and 2x500 mm. extension.

Ideal for installations that require longer reach or more lifting height.

The well-known traditional Winlet front design, which enables you to do 100% linear fine adjustments.

This front has hydraulic vertical lift and manual side shift.

## HS - HYDRAULIC SIDE SHIFT

A more compact and light front design with hydraulic side shift.

With this combination you will benefit from a more compact machine with higher lifting capacity - but with a little less reach and lifting height.

Option for HS: Hydraulic Rotation (Winlet 400CL/TL DHB HS/HR)

# PSAC - Proportional Single Axis Control

The well-known traditional Winlet control panel.

Choose the function you want to control and adjust the speed 100% stepless with the speed-slider. Only one function can be operated at a time.

# MAC - MULTI AXIS CONTROL

Use several hydraulic functions simultaneously.

The Multi Axis Control is very easy to use, even for operators with large gloves on their hands. Choose between 3 preset speed levels: 10% - 50% - 100%.

Option for MAC : Radio Remote with proportional control.

\*Shown example of configuration is a Winlet 400 Compact Lifter (CL) with Single Hydraulic Boom (SHB), Hydraulic Vertical lift (HV) and Proportional Single Axis Control (PSAC)

# Winlet 400

CL SHB HV

Compact model, with compact/ short reach and a front with vertical hydraulic fine adjustment and manual side shift.

- i MAX LIFTING CAPACITY 400 KG
- ; WIDTH 690 MM
- i Max Lifting Height **3.078 mm**
- *i* Hydraulic fine lift **200 mm**

Are you looking for an extremely compact glazing robot with superior fine adjustment features? Here it is!

Winlet 400CL is built to get through narrow passageways and operate in confined space. All the while still having the capacity of lifting an impressive 400 kg.

Winlet 400CL is equipped with extra narrow steering and traction wheels and has a width of only 690 mm when the load is on the side of the machine.

#### SAFETY APPROVED

All the glazing robots in the Winlet 400 series live up to the European Standard: 13000 - 2010 Cranes-Mobile Cranes.

The European standard is applicable to the design, construction, installation of safety devices, information for use, maintenance, and testing of mobile cranes.

All Winlet 400 configurations are available with one of two different operating panels.

- **1. PSAC (Proportional Single Axis Control)**, the traditional Winlet controls, where one function is operated stepless.
- **2.** MAC (Multi Axis Control), which allows controlling of more hydraulic functions at a time. The operator can adjust the speed at the levels: 100 % 50 % 10 %.

As an option for MAC, you can chose a Radio Remote control where the functions are operated proportionally without set speed levels.

#### **KEY ADVANTAGES**

- · Powerful front-wheel drive
- Electromagnetic brakes
- Integrated safe & reliable 2-circuit vacuum system
- Ecomatic battery-saving system
- Intelligent overload monitoring system
- Safety tiller switch on the steering handle
- Easy maneuvering with an ergonomic operating lever
- 100% linear movements at the front
  - up/down & sideways
- Hydraulic linear movements controlled at the front
- Integrated lifting eye for lifting the Winlet by crane
- Weather-resistant design

As an option for MAC, you can chose a Radio Remote control where the functions are operated proportionally without set speed levels.

#### **KEY ADVANTAGES**

- Powerful front wheel drive
- Electromagnetic brakes
- Integrated safe & reliable 2 circuit vacuum system
- Ecomatic battery saving system
- Intelligent overload monitoring system
- Safety tiller switch on steering handle
- Easy maneuvering with ergonomic operating lever
- Hydraulic linear sideways movements controlled in the front
- Integrated lifting eye for lifting the Winlet by crane
- Weather resistant design

<sup>\*</sup>The dimensions are indicative and may vary +/- 10mm. The photographs and/or drawings in this document are for illustrative purposes only.

# Winlet 400 CL DHB HS HR

Compact model with extra reach and a front with Horizontal hydraulic side shift.

- i max lifting height **3.465 mm**
- *i* WIDTH **690 MM**
- i MAX LIFTING CAPACITY 400 KG
- *i* Hydraulic side shift **100 mm**
- i HYDRAULIC ROTATION 360°

Are you looking for an extremely compact glazing robot with extra lifting height and reach? This is it!

Winlet 400CL is built to get through narrow passageways and operate in places with limited space.

Winlet 400CL is equipped with extra narrow steering and traction wheels and has a width of only 690 mm when the load is on the side of the machine.

#### SAFETY APPROVED

All the glazing robots in the Winlet 400 series live up to the European Standard: 13000 - 2010 Cranes-Mobile Cranes.

The European standard is applicable to the design, construction, installation of safety devices, information for use, maintenance and testing of mobile cranes.

All Winlet 400 configurations are available with one of two different operating panels.

- **1. PSAC (Proportional Single Axis Control)**, the traditional Winlet controls, where one function is operated stepless.
- **2.** MAC (Multi Axis Control), which allows controlling of more hydraulic functions at a time. The operator can adjust the speed at the levels: 100 % 50 % 10 %.

As an option for MAC, you can chose a Radio Remote control where the functions are operated proportionally without set speed levels.

# Winlet 400

TL DHB HS HR

Off-road model with great stability, extra reach, and a front with horizontal hydraulic side shift and hydraulic rotation.

- MAX LIFTING HEIGHT 3.465 MM
- i WIDTH 860 MM
- $m{i}$  max lifting capacity **415 kg**
- *i* HYDRAULIC SIDE SHIFT **100 MM**
- ; HYDRAULIC ROTATION 360°

Are you looking for an off-road glazing robot with extra lifting height and an impressive lifting capacity? This is it!

Winlet 400TL is built to operate in an outdoor terrain and is extremely stable.

Winlet 400TL is equipped with extra wide steering and traction wheels making it extremely stable and ideal for outdoor installations.

#### SAFETY APPROVED

All the glazing robots in the Winlet 400 series live up to the European Standard: 13000 - 2010 Cranes-Mobile Cranes.

The European standard is applicable to the design, construction, installation of safety devices, information for use, maintenance and testing of mobile cranes.

All Winlet 400 configurations are available with one of two different operating panels.

- **1. PSAC (Proportional Single Axis Control)**, the traditional Winlet controls, where one function is operated stepless.
- **2. MAC (Multi Axis Control),** which allows controlling of more hydraulic functions at a time. The operator can adjust the speed at the levels: 100 % 50 % 10 %.

As an option for MAC, you can chose a Radio Remote control where the functions are operated proportionally without set speed levels.

#### **KEY ADVANTAGES**

- Powerful front wheel drive
- Electromagnetic brakes
- Integrated safe & reliable 2 circuit vacuum system
- Ecomatic battery saving system
- Intelligent overload monitoring system
- Safety tiller switch on steering handle
- Easy maneuvering with ergonomic operating lever
- Hydraulic linear sideways movements controlled in the front
- Integrated lifting eye for lifting the Winlet by crane
- Weather resistant design

The company GMV A/S was founded in 1988. In 2008, the company was taken over by Jesper Faurskov and Erik Pedersen. The vision of GMV is:

GMV must be at the cutting edge of market needs, and match these needs by developing unique technical solutions which aid heavy manual lifting with modern design.

# A HEALTHY WORKING ENVIRONMENT MEANS HAPPY EMPLOYEES

GMV provides solutions for heavy manual lifting for the building and manufacturing industries.

#### **CONSULTING, ENGINEERING AND PLANNING**

We are with you from start to finish. We provide qualified advice and listen to your needs.

# THE MARKETS BEST SOLUTIONS AND PRODUCT BRANDS

We provide innovative solutions that suit your needs.

#### LOCAL COMPANY WITH GLOBAL SALES

With our strong dealer network, we sell products worldwide.

#### **EDUCATION AND SERVICE**

Our highly trained experts guide and instruct distributors and end users.

#### **ASSEMBLY AND MAINTENANCE CHECK**

Our strong team is responsible for assembly and service, both locally and internationally.

#### PRODUCT DEVELOPMENT

GMV develops products from scratch. Focus is always on a good working environment.

#### **MODERN INDUSTRIAL DESIGN**

Our award-winning Danish design is combined with unique technical solutions for both the building and manufacturing industries.

# DANISH PRODUCTION LINE ACCORDING TO EUROPEAN STANDARDS

We have our own local production and use local suppliers. This ensures local jobs and high quality.

#### THOROUGH FACTORY TESTING AND DOCUMENTATION

All of our products undergo rigorous testing before leaving the factory and comprehensive technical documentation always accompanies our products.

#### TRAINING FOR SERVICE TECHNICIANS

To ensure that our products last as long as possible and that local laws are respected, we conduct thorough training with your service technicians - both nationally and internationally.
